

Mi-Jack Corporation

Manufacturing, Sales and Distribution

ERP Implementation, Data Migration and DocuSign Integration.

Mi-Jack Corporation

operational cost.

Executive Summary

We successfully completed the ERP Implementation, Data Migration and DocuSign Integration, for two years the implementation was going on without any visibility to stakeholders. MiJack's stakeholders decided to engage Agelix to assess the situation and then continue with the implementation. Some of the major business functions were executed manually due to legacy system also increased the vendor cost.

How we Helped

- Some of the major business functions were executed manually as legacy system was not supporting these functions, such as forecasting, budgeting, field services etc.
- The engaged vendor cost was very high, which was impacting

Results, Return on Investment and Future Plans

- Close to industry standard implementation with minimum customization.
- Within 9 months we completed end to end implementation and went live.
- Complete data migration from the legacy system to new ERP system and decommissioned the legacy systems and saved the maintenance cost on legacy system.
- Third party software such as DocuSign is integrated, data from third party CRM and Sales Logix is migrated to ERP and the yearly license cost of the software was saved.
