

# Broderson Manufacturing Manufacturing of equipment

Epicor Product Integration and.

Webco Manufacturing

## Executive Summary

We successfully integrated and implemented the custom smart equipment system with Broderson ERP system. We were able to reduce the Human capital expenses for the parts sales was reduced considerably. This has impacted the parts sales with higher trend since the forecasting helped to reduce the stock inventory with on-time deliver to the customer.

## How we Helped

- The Agelix team developed a program to scan the equipment manual and generated the xml file consumed by smart equipment system to generate the pictorial view of the parts.

- Agelix's team automated the process by integrated Broderson ERP system with the Smart Equipment System using SOA architecture to receive the parts requisition and process the order without manual intervention.

## Results, Return on Investment and Future Plans

- Human capital expenses for the parts sales was reduced considerably.
- The parts sales went up and the forecasting was accurate to optimize the stock.
- Customer satisfaction rating went up.
